Magazine surveyed 350,00 business executives, graduates, global business influencers, industry professionals, and business leaders in 156 countries and territories between September 15, 2022, and December 22, 2022. Ten percent of the line, and 8% by post or face-to-face. All quantitative interviews were conducted on a confidential basis, without

The rankings are based on seven major metrics of quality and reputation. The overall Score (100%) is the sum of the following:

- 1) Academic reputation
- 2) Admission Eligibility
- 3) Job placement rate
- 4) Recruiter feedback
- 5) Specialization
- 6) Global reputation and influence
- 7) Annual tuition and fees

However, this is by no means a comprehensive list; At the same time, the institutions above are the CEOWORLD magazine's "best business schools in the world for 2023," and there may be many other business schools that offer excellent programs. This ranking should not be viewed as the most essential aspect when choosing a business school and are merely one element to consider.

The margin of sampling error for the total sample of 350,00 respondents is plus or minus 1.2 percentage points. In addition to sampling error, one should bear in mind that, as in all survey research, there are possible sources of error—such as coverage, nonresponse, and measurement error—that could affect the results.

Not all figures add up to 100% as a result of rounding percentages and excluding 'neither/nor' and 'don't know' responses from the exhibit. Unless otherwise stated, the base for global figures is 350,00 (global respondents). All answers are confidential to allow survey participants to share their perspectives in a respectful, truthful, unbiased, and collegial setting.
